TechTarget Storage Magazine and SearchStorage.com Selects Hammerspace as a Storage Product of the Year for 2019

Hammerspace Nabs Silver in the Cloud Storage Category

Los Altos, Calif. – February 18th, 2020 – Hammerspace, a software company modernizing workflows with file storage for the hybrid multi-cloud and containers, today announced the decision by the editors of Storage Magazine and SearchStorage.com to award the silver position to Hammerspace for the 2019 storage product of the year in the cloud storage category.   This is the 18th annual Storage magazine and SearchStorage Products of the Year awards and there were 50 finalists out of nearly 100 entries.

 "We are honored to be so highly recognized in the cloud storage category by the tech editors from Storage Magazine and SearchStorage.com," said David Flynn, CEO at Hammerspace. "Taking silver in a category with such stiff competition is validating to us that the Hammerspace approach to hybrid cloud file storage is what the industry wants and needs."

Comments from the judges supported Hammerspace's leadership position in this category. "Hybrid storage has been great in concept, less great in execution," one judge said. "Hammerspace seems to provide a big part of what has been missing to make hybrid seamless and efficient." Another judge commented "The service's approach to separating the data plane from the control plane makes this a promising storage technology. It also has solid support for integrating with other systems, with lots of thought given to management."

About the *Storage* magazine and SearchStorage Products of the Year

Storage magazine and SearchStorage invited data storage product companies to nominate new or enhanced products for the 2019 Products of the Year awards. For previously available products, the upgrade must have incorporated significant new features. Products could be entered in one of five categories: backup and disaster recovery hardware, software and services; cloud storage; disk and disk subsystems; hyper-converged and composable infrastructures; and storage system and application software. Products were judged by a panel of analysts, consultants, and *Storage* magazine and SearchStorage editors. Products were rated based on innovation, performance, ease of integration into environment, ease of use and manageability, functionality and value.

About TechTarget's SearchStorage.com

TechTarget's SearchStorage.com is the No. 1 online destination for IT professionals charged with purchasing, implementing and managing storage systems at the core of large- and medium-sized businesses. More than 600,000 storage-focused IT executives, managers and staff rely on SearchStorage for the information they need to do their jobs.
